Introduction

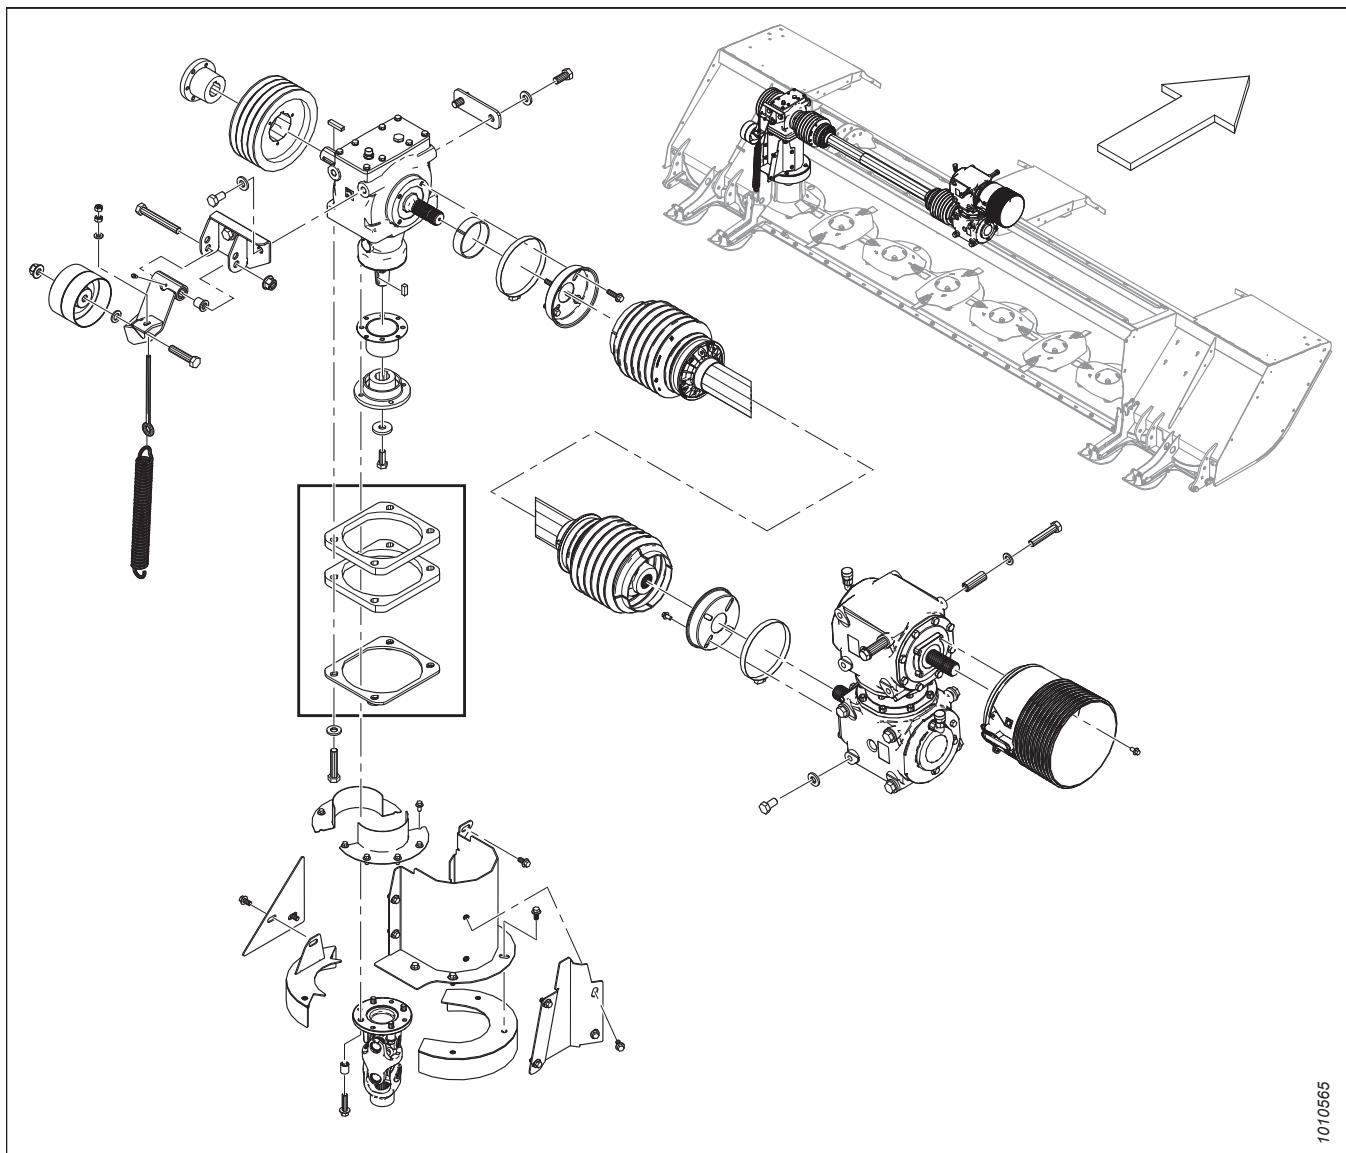

This Parts Catalog lists all the replacement parts that can be ordered for a MacDon R113 or R116 Rotary Disc Pull-Type.

When ordering, be sure to use the complete and proper part number. Some parts vary with header size; be sure you are ordering the correct part number for your unit.

Bold text is used to indicate updates made at the current revision level. With each new revision of the catalog, previous revisions are returned to regular text.

Electrical connectors used on MacDon products are available for sale but not listed in this catalog. For the list of available connectors, refer to the Electrical Connectors Parts Catalog (MD #169641).

In this catalog, right-hand (RH) and left-hand (LH) are determined from the operator's seated driving position in the tractor cab. An arrow is sometimes used in illustrations to indicate forward position as shown below.

PREPARATION/WARNING: Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (NIOSH Approved) and proper containment and clean up. For more information, call the National Lead Information Center at 1-800-424-LEAD (in US) or your local health authority.

Surface must be free of grease, rust, dirt and wax. Mask off or protect other areas from overspray. Product should be sprayed in a well-ventilated area. Use room temperature 21°C (70°F) for best application.

FOR BEST RESULTS: Shake until ball inside can settles. Hold can at top, and swing bottom of can in a circle for at least 2 minutes, making ball travel around bottom perimeter of can.

Shake up and down occasionally. Repeat shaking procedure for 10 seconds after each use of spraying. Press spray trigger to spray. Spray distance is 15-25 cm (6-8 inches) from surface. Apply several thin coats. To prevent chipping, close the valve by holding capsule down, and spray until only clear gas remains out.
